Chris,

I oppose this legislation. It is getting ridiculous how cuts are being made to affect our children and the future of our country. I'm sure other cuts could be made that would have far less impact to our future. We elect highly educated people to make decisions for us in government. It time they put their education to work and earn their salaries and find a way to take care of the people, and their families, that put them in the position they hold. Stop making the popular cuts and votes and start looking out for the well being of the people of this country.
